

# COMPANY PROFILE

2026

# who we are

Crisp Environmental is a young, forward-thinking environmental services company leveraging almost 30 years of combined experience in consulting, with cutting-edge drone technology to provide smarter, faster, and more accurate environmental solutions. We are committed to providing sustainable, precise and innovative solutions to government, industry and the private sector, with integrity, trust and honesty. Crisp Environmental operates under a valid Remote Operator Certificate (ROC) / Unmanned Aircraft System Operating Certificate (UAS-OC) for all drone services.

## vision

We envision **Crisp Environmental** as the leading authority in eco-conscious services and aerial data intelligence across South Africa. Our aspiration is to set industry standards through innovation and a strong commitment to environmental stewardship. By relentlessly pursuing excellence and building trust with our clients, we aim to lead in sustainable practices and technological advancements within the environmental sector, ensuring that we make a positive impact on both the industry and the communities we serve.

## mission

At **Crisp Environmental**, we are dedicated to delivering top-tier environmental and aerial services that not only protect ecosystems but also empower decision-makers with the insights needed for more sustainable and efficient operations. Through the integration of advanced technologies, like drones, we enhance the speed and accuracy of data collection and analysis, offering our clients clear and actionable solutions. Our mission is deeply rooted in upholding our core values of integrity, trust, and honesty, ensuring that every service we provide is both reliable and ethically conducted.

# more about us
